RECENT PROJECTS

ANIMAL APPAREL, Full Stack Developer on a team of 5 - animalapparel.herokuapp.com

An e-commerce store for people and their pets in homage to American Apparel (RIP), built over a five day sprint.

Responsible for:

- Writing the custom middleware to manage cart api requests and persist carts whether or not the user is authenticated via Passport sessions, cookies, and good ol' fashioned JavaScript.
- Modeling and persisting orders and products with Sequelize and PostgreSQL
- Building our RESTful API using Node/Express
- Creating modular, Redux managed React components to render the cart and single product views
- Styling all views responsively with React Bootstrap and CSS3
- Curating and editing all image assets with Photoshop CC

BODHI, Front End Developer on a team of 5 - bodhi.community

A purpose driven social network for fostering location based community support systems, built over a two week sprint.

Responsible for:

- Creating modular, Redux managed React components for the forms, editable profile, notification and network views
- Styling all views responsively with Material UI and CSS3
- Curating and editing all image assets with Photoshop CC

WORK EXPERIENCE

E-Commerce & Sales Associate, Practical Cycle 2014–2016

Content marketing and site maintenance (Joomla) for the #1 US Pedego Electric bike dealer.

Administrative Manager, Green Acres Nursery & Supply 2014–2016

Supervised a staff of up to 90 employees, effectively balancing Human Resources/Administrative roles with operations needs of Northern California's largest independently owned retail plant nursery.

Regional Field Organizing Fellow, Real Food Challenge 2012–2013

Worked remotely as part of a core leadership team organizing a statewide, multicampus student campaign for *real* (community-based, humane, fair, ecologically sound) college foodservice.
